ASVITHA S

Entry-Level Software Developer | Java Backend | SAP ABAP RAP | IoT Systems
asvitha1212@gmail.com | asvitha.eee2022@citchennai.net | +91 9486517536 | LinkedIn: Asvitha S | GitHub: Asvitha-12

SUMMARY

Final-year B.E. EEE student targeting software development roles with project experience in Java backend development, SAP ABAP RAP, REST APIs, CDS Views, OData services, CRUD workflows, and IoT monitoring systems. Built enterprise-style applications for medical records, inventory valuation, and return/refund processing. Solved 600+ coding problems on SkillRack and certified as an SAP ABAP Backend Developer.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, SAP ABAP, C
Java Backend: Core Java, OOP, REST API design, Spring Boot basics, SQL, JUnit basics, Docker basics
SAP / Enterprise: ABAP RAP managed/unmanaged, CDS Views, OData Services, Service Bindings, CRUD operations, validations, exception handling, S/4HANA basics
Embedded / IoT: Arduino, ESP32, sensors, remote switching, surveillance and monitoring systems
Tools: SAP development tools, Arduino IDE, MATLAB, Microsoft Excel, Word, PowerPoint

SOFTWARE PROJECTS

Smart Power Substation Monitoring and Alert System | ***Java, Spring Boot, PostgreSQL, MQTT, WebSocket, Redis, Docker | In Progress***

- Building a Java backend system to ingest real-time substation sensor data including temperature, smoke, voltage, current, and device status.
- Designing REST APIs for substations, devices, sensor readings, alert rules, operator acknowledgements, remote switching, and audit logs.
- Planned MQTT-based data ingestion, WebSocket live alert broadcasting, PostgreSQL persistence, Redis latest-reading cache, and rule-based fire/overload detection.
- Mapping the system to an IoT substation workflow with surveillance, fire detection, alert escalation, and operator-controlled switching actions.

Product Return and Refund System | ***SAP ABAP RAP, SAP SD***

- Built a return and refund processing application using unmanaged RAP business logic for custom CRUD behavior.
- Implemented CDS Views, behavior definitions, validations, exception handling, and manual data operations for return lifecycle handling.
- Applied SAP SD concepts including sales returns, billing correction, refund processing, and business-rule validation.

Medical Records Management System | ***SAP ABAP RAP, CDS Views, OData Services***

- Developed a backend application to manage patient and medical record data using SAP ABAP RAP in managed and unmanaged scenarios.
- Modeled business entities with CDS Views and behavior definitions; exposed CRUD operations through OData services and service bindings.
- Applied transaction handling, validations, and exception handling to maintain consistency during service execution.

Jewelry Store Stock Valuation System | ***SAP ABAP RAP, CDS Views, Service Binding***

- Built an inventory valuation application to create, update, track, and value jewelry stock records using managed RAP.
- Designed CDS data models, behavior definitions, service bindings, and transaction logic for stock monitoring and valuation updates.

INTERNSHIP EXPERIENCE

Shakthi Power, Chennai | ***Intern | May 2025 - June 2025***

- Gained hands-on exposure to solar panel design, manufacturing, installation workflows, and field-level power system practices.
- Understood solar system components, wiring flow, installation checks, and basic troubleshooting during deployment activities.

Industrial Controls and Drives India Private Limited, Chennai | ***Intern | Nov 2023 - Dec 2023***

- Worked on electronic meter manufacturing and testing, including calibration, component evaluation, and quality validation.
- Observed engineering practices followed during meter production, inspection, and validation before delivery.

Bunge India Private Limited, Tiruchirappalli | ***Intern | May 2023 - June 2023***

- Studied industrial electrical distribution, protection systems, transformer operation, load management, and powerhouse safety practices.

EDUCATION

Bachelor of Engineering, Electrical and Electronics Engineering - Chennai Institute of Technology | CGPA: 7.6/10 | 2022 - 2026

CERTIFICATIONS AND ACHIEVEMENTS

- SAP ABAP Backend Developer (S/4HANA) - certified with 100% score.
- SkillRack: solved 600+ programming problems, completed 489 tutorials, and attempted 139 tests.
- Secured 4th rank in Hack Fusion conducted by NIT Jamshedpur; participated in TCS CodeVita, Flipkart Grid 5.0, and ServiceNow Women.
- Completed Coursera courses in Solar Energy Basics, IoT Devices & Communications, Electric Power Systems, Electrical Circuits Protection and Switchgear, and UiPath Automation Explorer Skill-A-Thon.

LEADERSHIP

- Event Organiser for Impulse Technical Symposium; coordinated event planning, participant communication, and execution support.
