SUMMARY

Entry-level Software QA Tester with hands-on experience in manual, API, and database testing using Postman and SQL. Tested 6+ e-commerce workflows, 25+ APIs, and 40+ SQL queries, with experience in test case design, defect reporting, functional, smoke, and regression testing. Immediate joiner.

TECHNICAL SKILLS

Testing: Manual, Functional, Test Case Design, Smoke, Regression, Defect Reporting, API Testing, Post-deployment Testing.
Automation & CI/CD: GitHub Actions, CI/CD, Python Scripting, YAML, Release Automation, Automated Smoke Testing.
DevOps & Tools: Docker, Git, GitHub, Git Tags, Semantic Versioning, Postman, REST APIs, JSON, HTTP Status Codes, VS Code, IntelliJ IDEA, Eclipse, Excel.
Programming & Database: Python, Java, JavaScript, SQL, HTML, CSS, PostgreSQL, Backend Data Validation.

SOFTWARE TESTING PROJECT

E-Commerce Web Application Testing *Manual Testing, Postman, SQL*

- Designed and executed test cases for login, registration, product search, cart, checkout, and order workflows.
- Performed positive, negative, boundary, smoke, and regression testing; logged defects with severity, priority, reproduction steps, and retest status.
- Tested 25+ REST API requests using Postman; validated status codes, request/response data, and JSON responses.
- Executed 40+ SQL queries to validate backend data for users, products, carts, orders, and payments.

SOFTWARE PROJECTS

Automated Release Readiness & Rollback Pipeline *GitHub Actions, Python, Docker, Git, REST APIs*

- Built 10+ automated stages covering version validation, builds, unit tests, release checks, Docker image creation, deployment, smoke testing, rollback, and release summaries.
- Developed 4 Python scripts for semantic version validation, release-readiness checks, REST API health testing, release-state tracking, and rollback execution.
- Created 9 automated test cases and implemented rollback using current/previous stable release-state files with CI-safe fallback reporting.

Smart Power Substation Monitoring and Alert System *Java, Spring Boot, PostgreSQL, MQTT, WebSocket*

- Developed a Spring Boot backend for monitoring temperature, smoke, voltage, current, and device status.
- Designed 10+ REST APIs for sensor monitoring, alerts, acknowledgements, and remote operations; integrated PostgreSQL with MQTT/WebSocket.

Product Return and Refund System *SAP ABAP RAP, SAP SD, OData*

- Developed return and refund workflows across 5+ business entities with CRUD operations, validations, and business rules.
- Created CDS Views, Behavior Definitions, and OData Services for end-to-end processing.

CERTIFICATIONS AND ACHIEVEMENTS

- SAP ABAP Backend Developer (S/4HANA) – Certified.
- 600+ programming problems solved on Skill Rack.
- Secured 4th Rank in Hack Fusion conducted by NIT Jamshedpur.
- Participated in TCS Code Vita, Flipkart Grid 5.0, and ServiceNow Women.

EDUCATION

Bachelor of Engineering, Electrical and Electronics Engineering *2022–2026*
Chennai Institute of Technology **CGPA: 7.6**

INTERNSHIP EXPERIENCE

Shakthi Power, Chennai *May 2025 – June 2025*
Solar System Design & Installation – Practical exposure to solar system design, installation, and electrical safety.
Industrial Controls and Drives India Pvt. Ltd., Chennai *Nov 2023 – Dec 2023*
Electronic Meter Testing & Calibration – Assisted with meter testing, calibration, and measurement verification.

LEADERSHIP

Event Organizer, Impulse Technical Symposium – Coordinated event planning, participant communication, and execution support.
